Regulated market on which the securities issued are traded: Bucharest Stock Exchange – Standard category.

Other Events to report

CEMACON announces investors regarding the development of the project "Investing in a new, eco-friendly ceramic coating production line", project co-financed under the EEA Financial Mechanism 2014-2021, according to the contract 2020547221 concluded with Innovation Norway, as program operator. The total eligible value of the project is 4,210,060 euros, of which the non-reimbursable financial assistance is 1,900,000 euros. The duration of the project implementation is 20 months. The objective of the project is to increase the competitiveness of CEMACON SA by building and putting into operation a new ceramic-coated, environmentally friendly production line. The project envisages the construction of a new hall as well as the acquisition and installation of the latest generation equipment necessary for the 6 stages of production of the ceramic coating, including two electric forklifts.

The project is carried out in partnership with International Development Norway, a Norwegian organization with over 20 years of experience in developing good practice projects in the field of eco-business. The partnership will contribute to the development of a sustainable concept in order to increase CEMACON's competitiveness by greening the production processes and transforming the activities on the principles of LEAN production.
